

Materials Transactions, Vol. 50 Issue 7

表紙の一部に採用された図

Left (MF200912 Fig.1):

Bioactive nonwoven fabric consisting of a poly(lactic acid)-based composite containing siloxane-doped calcium carbonate particles.

Right (MF200912 Fig.1):

The surface of a fiber in the bioactive nonwoven fabric: numerous particles of $\sim 1\mu\text{m}$ ϕ , consisting of siloxane-doped calcium carbonate, are embedded in poly(lactic acid) matrix.
